DETAILED ACTION

Priority

1. Acknowledgment is made of applicants' claim for foreign priority based on an application filed in Canada on March 6, 2001. It is noted, however, that applicants have not filed a certified copy of the Canadian application as required by 35 U.S.C. 119(b).

Drawings

2. This application has been filed with informal drawings which are acceptable for examination purposes only. Formal drawings will be required when the application is allowed.

3. The drawings are objected to due to the reasons noted on the attached Form PTO 948. A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Election/Restriction

4. This application contains claims directed to the following patentably distinct species of the claimed invention: (A) Figure 11; (B) Figure 12; (C) Figure 13; (D) Figures 14-16, and (E) Figure 17.

Art Unit: 1724

Applicants are required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claim appears to be generic.

Applicants are advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicants will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicants must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicants traverse on the ground that the species are not patentably distinct, applicants should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Conclusion

5. Action on the merits of the claims is held in abeyance pending applicants' response. It is noted, however, that the word "conductivity" (claim 56, line 5) should apparently be changed to --conductivity--.
